KIKKERS

Harlequin Treefrog

Rhacophorus pardalis

Rhacophorus pardalis is a medium-sized, nocturnal flying frog from the rainforests of Borneo, Sumatra, the Malay Peninsula and the Philippines. The back is brown to reddish brown with a dark, X-shaped marking, the webbing is bright orange, and the belly and flanks are yellow with an orange-red net pattern. Females reach up to 7 cm. The species is rare in captivity, and little is known about its care.

Familie: Rhacophoridae Vroegere naam: *Rhacophorus rizali; Rhacophorus rhyssocephalus*

KERNGEGEVENS

HET DIER

Volwassen grootte	**5-7 cm** kop-romplengte
Levensduur	**5-10 jaar**
Actief	**'s nachts**
Levenswijze	**Boombewonend**
Leefgebied	**Regenwoud en moerasgebied**
Huidgif	**Geen bekend**
Moeilijkheidsgraad	**Ervaren**

VERZORGING

Min. terrarium	**45 × 45 × 60 cm** L × B × H voor 3 volwassen dieren
Temperatuur overdag	**22-26 °C**
Temperatuur 's nachts	**20-22 °C**
Luchtvochtigheid	**70-90%**
Water	**Waterbak** diepte 2-3 cm
UVB	**Aanbevolen** Fergusonzone 1
Voeding	**Insecten**
Gehouden	**Solitair, in paren of in groepen**

KWEEK

Voortplanting	**Eierleggend**
Ontwikkeling	**Kikkervisjes in het water**
Legplaats	**In een schuimnest**
Eieren per legsel	**100-200**
Larvenperiode	**85 dagen** van uitkomen tot metamorfose
Voeding van de larven	**Algen/planten en kant-en-klaar voer**
Broedzorg	**Geen**

BESCHERMING EN PAPIEREN

CITES	**Niet opgenomen**
IUCN	**Niet bedreigd (LC)**

Verzorging in het kort

HET TERRARIUM	Little is known about keeping *Rhacophorus pardalis*. The climate in its range is warm and very humid all year, and the figures in this guide are borrowed from *Rhacophorus reinwardtii*, which has the same size and requirements.
TEMPERATUUR	Keep the terrarium at 22-26 °C by day and 20-22 °C at night. Keep the temperature below 28 °C, and do not use heat lamps. Check with a digital thermometer, and be aware of the room temperature in summer.
LUCHTVOCHTIGHEID EN SPROEIEN	Humidity should be 70-90 %. Mist every evening with dechlorinated tap water, rainwater or reverse-osmosis water, and let the terrarium dry out a little during the day, so that the air does not stand still.
WATER EN WATERKWALITEIT	Place a stable, shallow water bowl in the terrarium, which the frog can sit in at night. 2-3 cm of water is enough, so that the frog easily gets out again.
VERLICHTING EN UVB	The frog is arboreal, and a weak UVB source of the type used for tropical forest animals is recommended. Always provide shaded places where the frog can retreat.
VOEDING	*Rhacophorus pardalis* eats live insects.
GEDRAG EN OMGANG	The species is nocturnal and spends the day hidden among the leaves. It lives mostly on its own outside the breeding season, and males call from the water's edge in the rainy season.
NATUURLIJK VERSPREIDINGSGEBIED	Brunei, Indonesië, Maleisië, Filipijnen en Thailand.
