LANDSCHILDPADDEN EN WATERSCHILDPADDEN

Southeast Asian Leaf Turtle

Cyclemys oldhami

Cyclemys oldhami is a dark, almost rectangular leaf turtle from forest streams in mainland South-East Asia. The shell is flat with a serrated rear edge, and the crown is pale with small dark spots. Adults spend a lot of time on land, while the young are mostly in the water. The species needs a large, humid aquaterrarium and clean water, and it is often confused with *Cyclemys dentata*.

Familie: Geoemydidae Vroegere naam: *Cyclemys oldhamii; Cyclemys shanensis; Cyclemys tcheponensis; Cyclemys tiannanensis*

KERNGEGEVENS

HET DIER

Volwassen grootte	**18-25 cm** totale lengte incl. staart
Levensduur	**15-25 jaar**
Actief	**In de schemering en ’s nachts**
Levenswijze	**Semi-aquatisch**
Leefgebied	**Regenwoud en moerasgebied**
Moeilijkheidsgraad	**Gevorderd**

VERZORGING

Min. terrarium	**130 × 65 × 75 cm** L × B × H voor 1 volwassen dier
Temperatuur overdag	**24-27 °C**
Zonneplek	**30-32 °C**
Temperatuur ’s nachts	**22-25 °C**
Luchtvochtigheid	**70-90%**
Water	**Aquaterrarium** diepte 15-20 cm
Watertemperatuur	**22-26 °C**
UVB	**Aanbevolen** Fergusonzone 1
Voeding	**Insecten, fruit, kant-en-klaar voer, gewervelde dieren en wormen/slakken**
Gehouden	**Solitair**

KWEEK

Voortplanting	**Eierleggend**
Legselgrootte	**2-4 eieren**
Incubatie	**90-110 dagen** bij 26-28 °C

BESCHERMING EN PAPIEREN

CITES	**Bijlage II**
EU-bijlage	**Bijlage B**
IUCN	**Bedreigd (EN)**

Verzorging in het kort

HET TERRARIUM

There is almost no care knowledge that applies specifically to *Cyclemys oldhami*.

TEMPERATUUR

Cyclemys oldhami needs 24-27 °C in the air by day, and the basking spot should be 30-32 °C. At night 22-25 °C is suitable. The water is kept at 22-26 °C. The figures are borrowed from *C. dentata*.

LUCHTVOCHTIGHEID EN WATER

Humidity for *Cyclemys oldhami* should be 70-90%. It is kept up with misting, a moist substrate layer with leaves and moist hides with sphagnum. Measure with a hygrometer in the middle of the enclosure.

VERLICHTING EN UVB

Cyclemys oldhami needs UVB for D3 synthesis, but is a forest animal and seeks shade. Use a UVB tube for shade-dwelling animals (Ferguson zone 1) over the land area and basking spot, and provide shade for the rest.

VOEDING

Cyclemys oldhami is omnivorous like the rest of the genus. In the wild it eats figs and other soft fruit, insects, worms, snails, fish and carrion, and the diet should reflect that.

GEDRAG EN OMGANG

Cyclemys oldhami is shy and hides a lot. The animals get to know their keeper and come forward at feeding time, but the species is not suited to handling.
