ESCINCÍDEOS

Bali Sun Skink

Eutropis multifasciata

A fast, diurnal skink from forest edges and clearings in South-East Asia. *Eutropis multifasciata* has a bronze-brown back, hunts insects in the leaf litter and gives birth to live young. It requires warmth, high humidity, UVB and a spacious enclosure with a loose substrate.

Família: Scincidae Nome anterior: *Mabuya multifasciata; Scincus multifasciatus*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**25-33 cm** comprimento total com a cauda
Longevidade	**8-10 anos**
Ativo	**De dia**
Estilo de vida	**Terrestre**
Habitat	**Floresta tropical**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**120 × 60 × 60 cm** C × L × A para 2 adultos
Temperatura, dia	**27-32 °C**
Ponto quente	**35-41 °C**
Temperatura, noite	**21-25 °C**
Umidade	**70-80%**
Água	**Recipiente de água**
UVB	**Essencial** Zona de Ferguson 3
Alimentação	**Insetos e frutas**
Mantido	**Em casal ou um macho com várias fêmeas**

REPRODUÇÃO

Reprodução	**Vivíparo**
Maturidade sexual	**11-12 meses**
Tamanho da ninhada	**2-10 filhotes**
Gestação	**60-90 dias**

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Não listado**
Anexo da UE	**Não listado**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO

Eutropis multifasciata is active and requires space. A single animal can be kept in at least 90 × 45 × 45 cm (length × width × height), and a pair, or a male with two females, needs at least 120 × 60 × 60 cm. Larger is better.

TEMPERATURA

The enclosure needs a clear gradient. The basking spot should be 35-41 °C, measured on the surface with an infrared thermometer, and the cool end is 27-32 °C.

UMIDADE E ÁGUA

Eutropis multifasciata requires a high humidity of 70-80 %, which may fall slightly during the day and rise at night. Mist the enclosure thoroughly twice a day, and mix water into the substrate.

ILUMINAÇÃO E UVB

Eutropis multifasciata is diurnal and needs UVB for as long as the light is on. A T5 HO tube with 5-6 % UVB in a reflector, covering the basking-spot side of the enclosure, gives Ferguson zone 3.

ALIMENTAÇÃO

Eutropis multifasciata eats mainly insects. Give a varied diet of roaches, crickets, mealworms, silkworms, black soldier fly larvae, snails and small locusts.

COMPORTAMENTO E MANUSEIO

Eutropis multifasciata is curious, but shy and fast, and it flees when disturbed. Females can be kept together, and a male can be kept with two females in a large enclosure with many hides; males must never be kept together.

ÁREA DE OCORRÊNCIA NATURAL

Índia, Bangladesh, China, Tailândia, Mianmar (Birmânia), Laos, Camboja, Vietnã, Malásia, Singapura, Indonésia, Brunei, Timor-Leste, Papua-Nova Guiné e Filipinas.
