CAMALEONES

Werner's Chameleon

Trioceros werneri

Trioceros werneri is a medium-sized, live-bearing chameleon from the cool mountains of southern and central Tanzania. The male has three horns, two above the eyes and one on the snout, while the female has only a single nasal horn or none at all. The species requires cool days, a pronounced drop in temperature at night and a long morning mist, and it is rare in captivity.

Familia: Chamaeleonidae Nombre anterior: *Chamaeleo werneri*

DATOS CLAVE

EL ANIMAL

Tamaño adulto	**25-30 cm** longitud total con la cola
Esperanza de vida	**5-6 años**
Activo	**De día**
Modo de vida	**Arborícola**
Hábitat	**Bosque de montaña**
Dificultad	**Avanzado**

CUIDADOS

Terrario mín.	**60 × 60 × 90 cm** L × An × Al para 1 adulto
Temperatura, día	**20-22 °C**
Punto caliente	**24-26 °C**
Temperatura, noche	**10-15 °C**
Humedad	**50-100 %**
UVB	**Recomendado** Zona Ferguson 2
Alimentación	**Insectos**
Se mantiene	**En solitario**

CRÍA

Reproducción	**Vivípara**
Madurez sexual	**6-12 meses**
Tamaño de la camada	**8-30 crías**
Puestas por año	**1**
Gestación	**210-300 días**

PROTECCIÓN Y TRÁMITES

CITES	**Apéndice II**
Anexo de la UE	**Anexo B**
UICN	**Preocupación menor (LC)**

Cuidados de un vistazo

EL TERRARIO

An adult needs an enclosure of at least 60 × 60 × 90 cm (length × width × height). The size is borrowed from other medium-sized mountain chameleons of the genus *Trioceros*, for example *Trioceros quadricornis*, and is a minimum.

TEMPERATURA

The species is a mountain animal and tolerates heat poorly. The daytime temperature in the enclosure should be 20-22 °C. At night the temperature should fall sharply to 10-15 °C.

HUMEDAD Y AGUA

The species requires high humidity, and the enclosure must dry out during the day.

ILUMINACIÓN Y UVB

The species is diurnal. Provide 12 hours of light a day all year round with a T5 HO tube of 6500 K or a powerful LED lamp across the width of the enclosure. UVB is recommended.

ALIMENTACIÓN

T. werneri is an insectivore and eats most things that are small enough. Give crickets, silkworms, grasshoppers, flies and other small insects of suitable size.

COMPORTAMIENTO Y MANIPULACIÓN

The species is kept singly. Adults bully each other and must not be kept together, and males must not be able to see each other. Gravid females are kept alone. The species is a display animal, not a pet.

ÁREA DE DISTRIBUCIÓN NATURAL

Tanzania.
