CAMÉLÉONS

African Chameleon

Chamaeleo africanus

Chamaeleo africanus is an arboreal chameleon from the dry savanna of the Sahel and along the Nile, from Mauritania to Sudan and Upper Egypt. It is often green with many black spots, has no lobes at the back of the head and reaches 23-46 cm in length. The species is rarely kept, and its care draws on its climate and on better-known species of the genus. It must live alone in a tall mesh enclosure with UVB.

Famille: Chamaeleonidae Ancien nom: *Chamaeleo aegyptius; Chamaeleo calcaratus; Chamaeleo candidus; Chamaeleo mexicanus; Chamaeleo basiliscus*
