GEKKO'S

Tokay gecko

Gekko gecko

South-east Asia's large, loud-voiced climber with a blue-grey body, orange spots and a call that sounds like to-keh. *Gekko gecko* is impressive and intelligent, but also defensive and quick to bite, and it is not an animal for anyone who wants to hold their reptile in the hand.

Familie: Gekkonidae Vroegere naam: *Lacerta gecko*

KERNGEGEVENS

HET DIER

Volwassen grootte	**25-35 cm** totale lengte incl. staart
Levensduur	**10-20 jaar**
Actief	**'s nachts**
Levenswijze	**Boombewonend en rotsbewonend**
Leefgebied	**Regenwoud en rotsachtig terrein**
Moeilijkheidsgraad	**Gevorderd**

VERZORGING

Min. terrarium	**60 × 60 × 120 cm** L × B × H voor 1 volwassen dier
Temperatuur overdag	**26-29 °C**
Zonneplek	**30-35 °C**
Temperatuur 's nachts	**23-26 °C**
Luchtvochtigheid	**60-80%**
UVB	**Aanbevolen** Fergusonzone 1
Voeding	**Insecten en gewervelde dieren**
Gehouden	**Solitair of in paren**

KWEEK

Voortplanting	**Eierleggend**
Geslachtsrijp	**12-36 maanden**
Legselgrootte	**2 eieren**
Legsels per jaar	**4-8**
Incubatie	**60-180 dagen** bij 25-30 °C

BESCHERMING EN PAPIEREN

CITES	**Bijlage II**
EU-bijlage	**Bijlage B**
IUCN	**Niet bedreigd (LC)**

Verzorging in het kort

HET TERRARIUM
An adult needs a tall enclosure of at least 60 × 60 × 120 cm (length × width × height), and a particularly large male should have 90 × 60 × 120 cm.

TEMPERATUUR
Gekko gecko likes it warm. By day the enclosure should be 26-29 °C with a warm spot under a lamp of 30-35 °C. Around 32 °C at the warm spot suits most animals.

LUCHTVOCHTIGHEID EN WATER
The humidity should be 60-80 %, measured in the middle of the enclosure. Mist thoroughly in the evening and lightly in the morning, so that the humidity rises at night and falls again during the day.

VERLICHTING EN UVB
The species is nocturnal and can live without UVB when it receives D3 as a supplement, but a weak UVB light is recommended today, and it is especially valuable for breeding females.

VOEDING
Gekko gecko is an insectivore. The staple diet is crickets and dubia roaches, supplemented with locusts and now and then waxworms, hornworms or morio worms for variety.

GEDRAG EN OMGANG
Gekko gecko is fast, strong and defensive. It hisses, gapes and lunges when it feels threatened, and a bite can break the skin. Do not reach for it, and do not count on it becoming tame.

NATUURLIJK VERSPREIDINGSGEBIED
Bangladesh, India, Nepal, Bhutan, Myanmar (Birma), Thailand, Cambodja, Laos, Vietnam, Maleisië, China, Taiwan, Filipijnen, Indonesië en Oost-Timor.
