SKINKEN

Bali Sun Skink

Eutropis multifasciata

A fast, diurnal skink from forest edges and clearings in South-East Asia. *Eutropis multifasciata* has a bronze-brown back, hunts insects in the leaf litter and gives birth to live young. It requires warmth, high humidity, UVB and a spacious enclosure with a loose substrate.

Familie: Scincidae Vroegere naam: *Mabuya multifasciata; Scincus multifasciatus*

KERNGEGEVENS

HET DIER

Volwassen grootte	**25-33 cm** totale lengte incl. staart
Levensduur	**8-10 jaar**
Actief	**Overdag**
Levenswijze	**Bodembewonend**
Leefgebied	**Regenwoud**
Moeilijkheidsgraad	**Gevorderd**

VERZORGING

Min. terrarium	**120 × 60 × 60 cm** L × B × H voor 2 volwassen dieren
Temperatuur overdag	**27-32 °C**
Zonneplek	**35-41 °C**
Temperatuur ’s nachts	**21-25 °C**
Luchtvochtigheid	**70-80%**
Water	**Waterbak**
UVB	**Onmisbaar** Fergusonzone 3
Voeding	**Insecten en fruit**
Gehouden	**In paren of één mannetje met meerdere vrouwtjes**

KWEEK

Voortplanting	**Levendbarend**
Geslachtsrijp	**11-12 maanden**
Worpgrootte	**2-10 jongen**
Draagtijd	**60-90 dagen**

BESCHERMING EN PAPIEREN

CITES	**Niet opgenomen**
EU-bijlage	**Niet opgenomen**
IUCN	**Niet bedreigd (LC)**

Verzorging in het kort

HET TERRARIUM

Eutropis multifasciata is active and requires space. A single animal can be kept in at least 90 × 45 × 45 cm (length × width × height), and a pair, or a male with two females, needs at least 120 × 60 × 60 cm. Larger is better.

TEMPERATUUR

The enclosure needs a clear gradient. The basking spot should be 35-41 °C, measured on the surface with an infrared thermometer, and the cool end is 27-32 °C.

LUCHTVOCHTIGHEID EN WATER

Eutropis multifasciata requires a high humidity of 70-80 %, which may fall slightly during the day and rise at night. Mist the enclosure thoroughly twice a day, and mix water into the substrate.

VERLICHTING EN UVB

Eutropis multifasciata is diurnal and needs UVB for as long as the light is on. A T5 HO tube with 5-6 % UVB in a reflector, covering the basking-spot side of the enclosure, gives Ferguson zone 3.

VOEDING

Eutropis multifasciata eats mainly insects. Give a varied diet of roaches, crickets, mealworms, silkworms, black soldier fly larvae, snails and small locusts.

GEDRAG EN OMGANG

Eutropis multifasciata is curious, but shy and fast, and it flees when disturbed. Females can be kept together, and a male can be kept with two females in a large enclosure with many hides; males must never be kept together.

NATUURLIJK VERSPREIDINGSGEBIED

India, Bangladesh, China, Thailand, Myanmar (Birma), Laos, Cambodja, Vietnam, Maleisië, Singapore, Indonesië, Brunei, Oost-Timor, Papoea-Nieuw-Guinea en Filipijnen.
