GECKOS

Psychedelic rock gecko

Cnemaspis psychedelica

Cnemaspis psychedelica is a small, diurnal rock gecko found only on two granite islands in southern Vietnam. It has orange limbs and tail, a blue-grey to purple body and a yellow net across the nape. The species was first described in 2010, is threatened and is listed in CITES Appendix I, so in practice it is only for specialists and conservation programmes.

Família: Gekkonidae

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**6-8 cm** comprimento focinho-cloaca
Longevidade	**6-7 anos**
Ativo	**De dia**
Estilo de vida	**Rupícola**
Habitat	**Floresta seca e terreno rochoso**
Dificuldade	**Especialista**

CUIDADOS

Terrário mín.	**80 × 70 × 120 cm** C × L × A para 2 adultos
Temperatura, dia	**27-31 °C**
Temperatura, noite	**24-28 °C**
Umidade	**65-85%**
Água	**Recipiente de água**
UVB	**Recomendado** Zona de Ferguson 1
Alimentação	**Insetos e pequenos invertebrados (colêmbolos, drosófilas)**
Mantido	**Em casal**

REPRODUÇÃO

Reprodução	**Ovíparo**
Maturidade sexual	**11-16 meses**
Tamanho da postura	**1-2 ovos**
Incubação	**60-103 dias** a 27-31 °C

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice I**
Anexo da UE	**Anexo A**
IUCN	**Em perigo (EN)**

Resumo dos cuidados

O TERRÁRIO	*Cnemaspis psychedelica* is so rare and so strictly protected that only a few animals are kept outside conservation programmes.
TEMPERATURA	Keep *Cnemaspis psychedelica* at 27-31 °C. This corresponds to conditions in the wild, where the air temperature averages 29 °C and the substrate about 27 °C, with small fluctuations over the year and only slightly cooler nights.
UMIDADE E ÁGUA	Keep the humidity at 65-85 %, preferably around 75 % with a misting system, which also dampens the temperature.
ILUMINAÇÃO E UVB	*Cnemaspis psychedelica* is diurnal but lives in the shade under a dense canopy and seldom goes out into direct sun. Natural, filtered daylight in a partly roofed room can be used.
ALIMENTAÇÃO	The species eats small, live arthropods. In the wild these are mainly spiders, cockroaches, ants and termites as well as snails and a little plant material, over 20 different prey types in all.
COMPORTAMENTO E MANUSEIO	*Cnemaspis psychedelica* is a shy rock dweller that flees into crevices when disturbed. The animals are small and easily injured, so treat them as animals to look at and not to pick up.
ÁREA DE OCORRÊNCIA NATURAL	Vietnã.
