GECKOS

## Striped leaf-toed gecko

# *Goggia lineata*

*Goggia lineata* is a tiny, pale grey and striped gecko from the western part of South Africa and the far south of Namibia. It reaches only about 4 cm including tail and is one of the smallest lizards in southern Africa. It is nocturnal and lives hidden under stones and vegetation. Almost nothing is known about its care, so this guide is based on the climate and habitat.

Família: Gekkonidae  Nome anterior: *Phyllodactylus lineatus*

### DADOS PRINCIPAIS

#### O ANIMAL

| | |
|---|---|
| Tamanho adulto | **4 cm**<br>comprimento total com a cauda |
| Longevidade | **5-8 anos** |
| Ativo | **À noite** |
| Estilo de vida | **Rupícola e terrestre** |
| Habitat | **Semideserto e terreno rochoso** |
| Dificuldade | **Experiente** |

#### CUIDADOS

| | |
|---|---|
| Terrário mín. | **30 × 20 × 20 cm**<br>C × L × A para 2 adultos |
| Temperatura, dia | **18-28 °C** |
| Temperatura, noite | **10-18 °C** |
| Umidade | **50-70%** |
| UVB | **Opcional** |
| Alimentação | **Insetos e pequenos invertebrados (colêmbolos, drosófilas)** |
| Mantido | **Em casal** |

#### REPRODUÇÃO

| | |
|---|---|
| Reprodução | **Ovíparo** |
| Tamanho da postura | **2 ovos** |
| Incubação | **60-90 dias**<br>a 24-27 °C |

#### PROTEÇÃO E DOCUMENTAÇÃO

| | |
|---|---|
| CITES | **Não listado** |
| Anexo da UE | **Não listado** |
| IUCN | **Menos preocupante (LC)** |

## Resumo dos cuidados

| | |
|---|---|
| **O TERRÁRIO** | There is no documented care for *Goggia lineata*. This guide is based on the climate in the species' range, the habitat and the animal's size of about 4 cm. |
| **TEMPERATURA** | Temperature has not been measured on the animals themselves, but follows the climate in the species' range: 24-28 °C by day and 16-18 °C at night in summer and a cool winter with 18-20 °C by day and 10-12 °C at night. |
| **UMIDADE E ÁGUA** | The humidity inside the animal's hide is not documented. The coastal climate is humid, the interior drier, and winter is the wet season, so 50-70 % suits. |
| **ILUMINAÇÃO E UVB** | The species is nocturnal and hides by day. UVB is not documented as necessary and is optional. |
| **ALIMENTAÇÃO** | In the wild the species eats mainly ants and termites, so offer the very smallest feeder insects: fruit flies, springtails and the smallest newly hatched crickets. Prey must be smaller than the animal's head. |
| **COMPORTAMENTO E MANUSEIO** | *Goggia lineata* is small, shy and fast and is not suitable for handling. It stays under cover most of the time and comes out at dusk and at night. |
| **ÁREA DE OCORRÊNCIA NATURAL** | África do Sul e Namíbia. |
