GECKOS

Lichtenfelder's gecko

Goniurosaurus lichtenfelderi

Goniurosaurus lichtenfelderi is a robustly built, nocturnal eyelid gecko from wooded slopes in northern Vietnam, with a purple ground colour and pale yellow cross-bands edged in black. It is kept at room temperature, feeds on insects and does not need UVB, but it is shy and needs many hides.

Família: Eublepharidae Nome anterior: *Eublepharis lichtenfelderi; Goniurosaurus murphyi*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**8-11 cm** comprimento focinho-cloaca
Longevidade	**10-15 anos**
Ativo	**À noite**
Estilo de vida	**Rupícola e terrestre**
Habitat	**Floresta tropical e terreno rochoso**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**80 × 50 × 40 cm** C × L × A para 2 adultos
Temperatura, dia	**20-24 °C**
Temperatura, noite	**16-20 °C**
Umidade	**60-80%**
Água	**Recipiente de água**
UVB	**Não necessário**
Alimentação	**Insetos**
Mantido	**Em casal ou um macho com várias fêmeas**

REPRODUÇÃO

Reprodução	**Ovíparo**
Tamanho da postura	**2 ovos**
Posturas por ano	**2-4**
Incubação	**60-70 dias** a 22-24 °C

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice II**
Anexo da UE	**Anexo B**
IUCN	**Vulnerável (VU)**

Resumo dos cuidados

O TERRÁRIO	A pair needs an enclosure of at least 80 × 50 × 40 cm (length × width × height), and a group needs more floor area.
TEMPERATURA	*Goniurosaurus lichtenfelderi* does well at ordinary room temperature and needs no extra heating. By day 20-24 °C is suitable, and at night the temperature may fall a couple of degrees to about 16-20 °C.
UMIDADE E ÁGUA	The species needs humid microclimates. Humidity should be 60-80 % during the day. Mist heavily every evening so that the humidity briefly reaches 85-95 %.
ILUMINAÇÃO E UVB	The species is nocturnal and does not bask, so UVB is not necessary. A weak daylight LED over the enclosure helps live plants and gives a natural day rhythm, and in a simple box without plants light can be dispensed with entirely.
ALIMENTAÇÃO	The species lives on insects and takes most feeder insects. Offer half-grown crickets, young dubia roaches and at most a few large superworms at a time so that the animals do not become fat.
COMPORTAMENTO E MANUSEIO	*Goniurosaurus lichtenfelderi* is shy and darts away quickly if startled. Some animals tolerate short sessions and walk around on an arm, but handling should be kept to a minimum, because it stresses the animal.
ÁREA DE OCORRÊNCIA NATURAL	Vietnã.
