GECKOS

Satanic leaf-tailed gecko

Uroplatus phantasticus

A small, nocturnal leaf-tailed gecko from the rainforests of Madagascar, whose flat, notched tail looks like a withered leaf. It is a master of camouflage and one of the most remarkable animals for the terrarium, but it is delicate and requires cool nights, high humidity and an experienced keeper.

Família: Gekkonidae Nome anterior: *Uroplates phantasticus; Uroplatus schneideri*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**5-8 cm** comprimento focinho-cloaca
Longevidade	**6-10 anos**
Ativo	**À noite**
Estilo de vida	**Arborícola**
Habitat	**Floresta tropical e floresta de montanha**
Dificuldade	**Experiente**

CUIDADOS

Terrário mín.	**30 × 30 × 45 cm** C × L × A para 1 adulto
Temperatura, dia	**21-25 °C**
Temperatura, noite	**15-18 °C**
Umidade	**60-100%**
UVB	**Opcional** Zona de Ferguson 1
Alimentação	**Insetos**
Mantido	**Sozinho, em casal ou um macho com várias fêmeas**

REPRODUÇÃO

Reprodução	**Ovíparo**
Tamanho da postura	**2 ovos**
Posturas por ano	**2-5**
Incubação	**67-130 dias** a 20-25 °C

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice II**
Anexo da UE	**Anexo B**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO	An adult can be kept in a tall enclosure of at least 30 × 30 × 45 cm (length × width × height). A pair or a male with a pair of females needs at least 40 × 40 × 60 cm, and more space is almost always better.
TEMPERATURA	The species tolerates heat very poorly. By day the temperature should be 21-25 °C, and at night it should fall to 15-18 °C. The clear drop at night is an important part of the animal's rhythm.
UMIDADE E ÁGUA	Humidity should fluctuate as in the rainforest: high at night, up towards 90-100 %, and lower by day, down towards 60 %.
ILUMINAÇÃO E UVB	The species is nocturnal and can live without UVB when the food is dusted with vitamin D3.
ALIMENTAÇÃO	The gecko feeds on live insects, which it hunts at night. Offer small crickets, locusts, roaches, flies and the like, smaller than the distance between the animal's eyes.
COMPORTAMENTO E MANUSEIO	The gecko is a quiet, secretive animal that sits motionless and camouflaged all day and only becomes active when it is dark. It should be handled only when necessary, because stress and the heat of the hand can harm it.
ÁREA DE OCORRÊNCIA NATURAL	Madagascar.
