GECKOS

Raukawa gecko

Woodworthia maculata

A small, nocturnal, stone-coloured gecko from New Zealand that lives on rocks, beaches and in scrub and can live beyond 30 years. It gives birth to live young and is very rare in enclosures outside its country of origin, so little is known about its care.

Família: Diplodactylidae Nome anterior: *Hoplodactylus maculatus; Naultinus maculatus*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**12-18 cm** comprimento total com a cauda
Longevidade	**30-40 anos**
Ativo	**À noite**
Estilo de vida	**Rupícola e terrestre**
Habitat	**Terreno rochoso e bosque e prado temperados**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**50 × 50 × 100 cm** C × L × A para 2 adultos
Temperatura, dia	**18-24 °C**
Temperatura, noite	**10-16 °C**
Umidade	**50-70%**
UVB	**Opcional** Zona de Ferguson 1
Alimentação	**Insetos, frutas, néctar e ração completa**
Mantido	**Em casal, um macho com várias fêmeas ou em grupo**

REPRODUÇÃO

Reprodução	**Vivíparo**
Maturidade sexual	**18-24 meses**
Tamanho da ninhada	**1-2 filhotes**
Posturas por ano	**1**
Gestação	**90-150 dias**

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice III**
Anexo da UE	**Anexo C**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO	Little is known about the care of *Woodworthia maculata*, because the species is hardly kept outside New Zealand.
TEMPERATURA	There are no documented temperatures for animals in captivity. The recommendation is based on the climate of the range: 18-24 °C by day and 10-16 °C at night, with a drop across the night and cooler conditions in winter.
UMIDADE E ÁGUA	Humidity should be 50-70 %, and the enclosure should be able to dry out partly during the day. Mist part of the enclosure lightly in the evening, so there is dew on leaves and stones.
ILUMINAÇÃO E UVB	The species is nocturnal, but it often sits at the entrance of its hide and takes a little light and warmth.
ALIMENTAÇÃO	*Woodworthia maculata* eats mainly nocturnal insects and other arthropods: crickets, moths, small cockroaches, spiders, beetles and flies. For juveniles use fruit flies, small moths, small flies and small crickets.
COMPORTAMENTO E MANUSEIO	*Woodworthia maculata* is shy and quickly retreats into hiding. It is not an animal for handling, and animals that are grabbed can lose the tail.
ÁREA DE OCORRÊNCIA NATURAL	Nova Zelândia.
