Yarrow's Spiny Lizard

Sceloporus jarrovii

Sceloporus jarrovii is a sturdy, rough-scaled lizard from mountain forests and rocky terrain in the south-western USA and northern Mexico. The male has a blue throat and blue belly, and both sexes have a black collar with a white edge. The species is diurnal, feeds on insects and requires a dry, well-ventilated enclosure with rocks, UVB, a hot basking spot and a cool winter rest. It gives birth to live young.

Família: Phrynosomatidae Nome anterior: *Sceloporus jarrovi*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**15-25 cm** comprimento total com a cauda
Longevidade	**4-7 anos**
Ativo	**De dia**
Estilo de vida	**Rupícola**
Habitat	**Floresta de montanha e terreno rochoso**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**90 × 45 × 45 cm** C × L × A para 1 adulto
Temperatura, dia	**26-28 °C**
Ponto quente	**35-40 °C**
Temperatura, noite	**16-20 °C**
Umidade	**30-50%**
Água	**Recipiente de água**
UVB	**Essencial** Zona de Ferguson 3
Repouso de inverno	**8-12 °C** 8-12 semanas
Alimentação	**Insetos**
Mantido	**Sozinho, em casal ou um macho com várias fêmeas**

REPRODUÇÃO

Reprodução	**Vivíparo**
Tamanho da ninhada	**2-14 filhotes**
Posturas por ano	**1**
Gestação	**180-240 dias**

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Não listado**
Anexo da UE	**Não listado**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO	There is only limited detailed knowledge about the care of *Sceloporus jarrovii*, and the recommendations here are based on the species' mountain climate and on close relatives.
TEMPERATURA	The enclosure needs a clear gradient. The air should be 26-28 °C by day, and the basking spot should be 35-40 °C at the surface, measured with an infrared thermometer.
UMIDADE E ÁGUA	The air should be dry to moderately humid: 30-50%. The species does poorly in humid, still air, so ventilation must be good. Provide a shallow, stable dish of fresh water, and change the water daily.
ILUMINAÇÃO E UVB	*Sceloporus jarrovii* is diurnal and basks in strong light, so it needs powerful lighting and UVB.
ALIMENTAÇÃO	*Sceloporus jarrovii* is a sit-and-wait hunter that eats beetles, grasshoppers, ants, wasps, caterpillars and spiders.
COMPORTAMENTO E MANUSEIO	The animal is fast and alert and defends itself by fleeing and biting. It is an animal to watch, not to handle. If it has to be picked up, hold the body from neck to vent.
ÁREA DE OCORRÊNCIA NATURAL	Estados Unidos e México.
