SAPOS E RÃS

Cinnamon Frog

Nyctixalus pictus

Nyctixalus pictus is a small, nocturnal tree frog from the rainforests of Borneo and Palawan. It is cinnamon to reddish brown with small white to yellow spots and grows to 3-4 cm. The species breeds in water-filled hollows, has no fixed breeding season and is bred fairly easily in a terrarium with a small water section.

Família: Rhacophoridae

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**3-4 cm** comprimento focinho-cloaca
Longevidade	**3-6 anos**
Ativo	**À noite**
Estilo de vida	**Arborícola**
Habitat	**Floresta tropical**
Toxinas na pele	**Nenhuma conhecida**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**45 × 45 × 45 cm** C × L × A para 3 adultos
Temperatura, dia	**24-27 °C**
Temperatura, noite	**20-23 °C**
Umidade	**80-100%**
Água	**Área aquática** profundidade 5-8 cm
UVB	**Opcional** Zona de Ferguson 1
Alimentação	**Insetos**
Mantido	**Em casal ou em grupo**

REPRODUÇÃO

Reprodução	**Ovíparo**
Desenvolvimento	**Girinos na água**
Local de postura	**Em folhas sobre a água**
Maturidade sexual	**8-12 meses**
Ovos por postura	**3-10**
Eclosão	**14 dias**
Fase larval	**50 dias** da eclosão até a metamorfose
Alimentação das larvas	**Algas/plantas**
Cuidado parental	**Nenhum**

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Não listado**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO	A terrarium of 45 × 45 × 45 cm is enough for three adults, but a larger, richly planted paludarium is the best home.
TEMPERATURA	Keep the terrarium at 24-27 °C by day, and let it fall to 20-23 °C at night. The species tolerates a night-time drop of up to 10 °C, so ordinary room temperature at night is fine.
UMIDADE E NEBULIZAÇÃO	Humidity must be very high, 80-100 %. Mist the terrarium every day, preferably late in the day just before or after the light goes off, with dechlorinated tap water, rainwater or reverse-osmosis water.
ÁGUA E QUALIDADE DA ÁGUA	The terrarium must have a permanent water section 5-8 cm deep, taking up a good part of the floor. The water must be clean and dechlorinated and at the same temperature as the air.
ILUMINAÇÃO E UVB	The species is nocturnal, and UVB is optional. A weak UVB tube with shaded places to retreat to is a good choice: it gives a little warmth and supports the daily rhythm.
ALIMENTAÇÃO	*Nyctixalus pictus* eats live insects. Adults take small crickets and other feeder insects of a suitable size, and young frogs take crickets of about 6 mm.
COMPORTAMENTO E MANUSEIO	The species is nocturnal and shy. By day it sits hidden among the leaves, and at night it is active on branches and leaves. The males call. A pair or a small group can be kept together in a roomy terrarium with many perches.
ÁREA DE OCORRÊNCIA NATURAL	Brunei, Indonésia, Malásia e Filipinas.
