SAPOS E RÃS

Fea's Treefrog

Zhangixalus feae

Zhangixalus feae is one of the largest flying frogs: a sturdy, green tree frog of up to 12 cm from humid mountain forest in northern South-East Asia, from Yunnan and Myanmar through Thailand and Laos to Vietnam. The frog glides between the branches with full webbing on hands and feet and lives hidden in the tree canopy. Very little is known about its care in captivity.

Família: Rhacophoridae Nome anterior: *Rhacophorus feae; Polypedates feae*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**7-12 cm** comprimento focinho-cloaca
Longevidade	**5-10 anos**
Ativo	**Ao crepúsculo e à noite**
Estilo de vida	**Arborícola**
Habitat	**Floresta tropical e floresta de montanha**
Toxinas na pele	**Nenhuma conhecida**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**80 × 50 × 100 cm** C × L × A para 2 adultos
Temperatura, dia	**20-24 °C**
Temperatura, noite	**15-20 °C**
Umidade	**60-90%**
Água	**Recipiente de água** profundidade 3-5 cm
UVB	**Recomendado** Zona de Ferguson 2
Alimentação	**Insetos**
Mantido	**Sozinho, em casal ou em grupo**

REPRODUÇÃO

Reprodução	**Ovíparo**
Desenvolvimento	**Girinos na água**
Local de postura	**Em um ninho de espuma**
Ovos por postura	**1.000-3.500**
Eclosão	**5-7 dias**
Fase larval	**35-45 dias** da eclosão até a metamorfose
Alimentação das larvas	**Ração completa**
Cuidado parental	**Nenhum**

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Não listado**
IUCN	**Menos preocupante (LC)**

Resumo dos cuidados

O TERRÁRIO	Little is known about keeping *Zhangixalus feae*.
TEMPERATURA	By day the temperature should be 20-24 °C and at night 15-20 °C, corresponding to a cooler living room. The temperature must not exceed 27 °C for any length of time.
UMIDADE E NEBULIZAÇÃO	Humidity should be 60-90 %, lowest by day and highest at night. Live plants keep the air humid, because they release water at night.
ÁGUA E QUALIDADE DA ÁGUA	Place a large, shallow water bowl in the terrarium, which the frog can sit in freely. The water should be 3-5 cm deep, so that the frog easily gets out again.
ILUMINAÇÃO E UVB	The species is arboreal and active at dusk, and a weak UVB source is recommended. A T5 tube with a low UVB share that gives a UV index of 1-3 on the uppermost leaves (Ferguson zone 2) is suitable.
ALIMENTAÇÃO	*Zhangixalus feae* eats live insects. Use crickets as the main food, supplemented with grasshoppers and cockroaches. All food must be gut-loaded and dusted with calcium, now and then with a vitamin supplement containing D3.
COMPORTAMENTO E MANUSEIO	The species is active at night and at dusk and sits hidden among the leaves by day. The frog is large and powerful and jumps and glides wildly when startled, so it should be handled as little as possible.
ÁREA DE OCORRÊNCIA NATURAL	China, Laos, Mianmar (Birmânia), Tailândia e Vietnã.
