Asian Leaf Turtle

Cyclemys dentata

A dark brown, leaf-shaped turtle from forest streams and damp forest in South-East Asia. The shell is low-domed and serrated at the rear, and the head and neck have red to orange stripes. Adults spend most of their time on land, while the young live in the water. The species needs a large, humid aquaterrarium and clean water, and it is shy.

Família: Geoemydidae Nome anterior: *Cyclemys dhor; Cyclemys orbiculata; Cyclemys ovata*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**15-25 cm** comprimento total com a cauda
Longevidade	**15-25 anos**
Ativo	**Ao crepúsculo e à noite**
Estilo de vida	**Semiaquático**
Habitat	**Floresta tropical e área úmida**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**130 × 65 × 75 cm** C × L × A para 1 adulto
Temperatura, dia	**24-27 °C**
Ponto quente	**30-32 °C**
Temperatura, noite	**22-25 °C**
Umidade	**70-90%**
Água	**Aquaterrário** profundidade 15-20 cm
Temperatura da água	**22-26 °C**
UVB	**Recomendado** Zona de Ferguson 1
Alimentação	**Insetos, frutas, ração completa, vertebrados e minhocas/caracóis**
Mantido	**Sozinho**

REPRODUÇÃO

Reprodução	**Ovíparo**
Maturidade sexual	**84-120 meses**
Tamanho da postura	**2-4 ovos**
Posturas por ano	**1-5**
Incubação	**90-110 dias** a 26-28 °C

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice II**
Anexo da UE	**Anexo B**
IUCN	**Quase ameaçado (NT)**

Resumo dos cuidados

O TERRÁRIO	There is little husbandry knowledge about *Cyclemys dentata*, and it is based on experience from the hobby, not on studies. The set-up is therefore also based on the species' habitat in forest streams.
TEMPERATURA	By day the air should be 24-27 °C, and the basking spot should be 30-32 °C. At night 22-25 °C is suitable. The water is kept at 22-26 °C; this figure is an estimate based on the air temperature.
UMIDADE E ÁGUA	Humidity should be 70-90%, preferably around 80% by day and higher at night. It is maintained by misting twice a day, a thick, damp substrate layer with leaf litter, and damp hides filled with sphagnum at the cool end.
ILUMINAÇÃO E UVB	The species is a forest dweller and needs weak UVB with shade for the rest. Use a T5 UVB tube for shade-dwellers (Ferguson zone 1), e.g. 5-6%, in a reflective fitting above the land section and the basking spot.
ALIMENTAÇÃO	The species is omnivorous and eats both animals and plants. Juveniles are fed every day or every other day, adults 2-3 times a week depending on body condition.
COMPORTAMENTO E MANUSEIO	*Cyclemys dentata* is shy and hides a great deal, and the species is not suited to handling. If you want contact, feed with tongs. Keep the animals singly, and provide plenty of hiding places and plants to avoid stress.
ÁREA DE OCORRÊNCIA NATURAL	Bangladesh, Mianmar (Birmânia), Tailândia, Camboja, Vietnã, Malásia, Singapura, Indonésia, Brunei e Filipinas.
