Southeast Asian Leaf Turtle

Cyclemys oldhami

Cyclemys oldhami is a dark, almost rectangular leaf turtle from forest streams in mainland South-East Asia. The shell is flat with a serrated rear edge, and the crown is pale with small dark spots. Adults spend a lot of time on land, while the young are mostly in the water. The species needs a large, humid aquaterrarium and clean water, and it is often confused with *Cyclemys dentata*.

Família: Geoemydidae Nome anterior: *Cyclemys oldhamii; Cyclemys shanensis; Cyclemys tcheponensis; Cyclemys tiannanensis*

DADOS PRINCIPAIS

O ANIMAL

Tamanho adulto	**18-25 cm** comprimento total com a cauda
Longevidade	**15-25 anos**
Ativo	**Ao crepúsculo e à noite**
Estilo de vida	**Semiaquático**
Habitat	**Floresta tropical e área úmida**
Dificuldade	**Intermediário**

CUIDADOS

Terrário mín.	**130 × 65 × 75 cm** C × L × A para 1 adulto
Temperatura, dia	**24-27 °C**
Ponto quente	**30-32 °C**
Temperatura, noite	**22-25 °C**
Umidade	**70-90%**
Água	**Aquaterrário** profundidade 15-20 cm
Temperatura da água	**22-26 °C**
UVB	**Recomendado** Zona de Ferguson 1
Alimentação	**Insetos, frutas, ração completa, vertebrados e minhocas/caracóis**
Mantido	**Sozinho**

REPRODUÇÃO

Reprodução	**Ovíparo**
Tamanho da postura	**2-4 ovos**
Incubação	**90-110 dias** a 26-28 °C

PROTEÇÃO E DOCUMENTAÇÃO

CITES	**Apêndice II**
Anexo da UE	**Anexo B**
IUCN	**Em perigo (EN)**

Resumo dos cuidados

O TERRÁRIO	There is almost no care knowledge that applies specifically to *Cyclemys oldhami*.
TEMPERATURA	*Cyclemys oldhami* needs 24-27 °C in the air by day, and the basking spot should be 30-32 °C. At night 22-25 °C is suitable. The water is kept at 22-26 °C. The figures are borrowed from *C. dentata*.
UMIDADE E ÁGUA	Humidity for *Cyclemys oldhami* should be 70-90%. It is kept up with misting, a moist substrate layer with leaves and moist hides with sphagnum. Measure with a hygrometer in the middle of the enclosure.
ILUMINAÇÃO E UVB	*Cyclemys oldhami* needs UVB for D3 synthesis, but is a forest animal and seeks shade. Use a UVB tube for shade-dwelling animals (Ferguson zone 1) over the land area and basking spot, and provide shade for the rest.
ALIMENTAÇÃO	*Cyclemys oldhami* is omnivorous like the rest of the genus. In the wild it eats figs and other soft fruit, insects, worms, snails, fish and carrion, and the diet should reflect that.
COMPORTAMENTO E MANUSEIO	*Cyclemys oldhami* is shy and hides a lot. The animals get to know their keeper and come forward at feeding time, but the species is not suited to handling.
ÁREA DE OCORRÊNCIA NATURAL	Mianmar (Birmânia), Tailândia, Camboja, Vietnã e Laos.
